

Summer Item Sales Business Analysis

WELCOME!

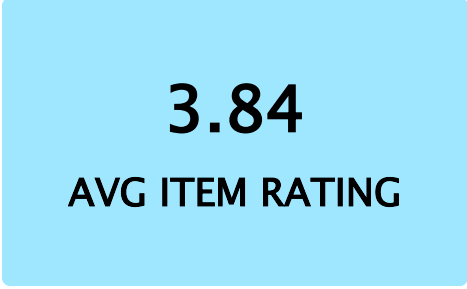

This report focuses on the sales performance of summer-themed products on wish.com. Summer clothes are defined here as clothing items stored under the theme "Summer".

The report is based on data of item prices, merchants, units sold, and ratings. The purpose of this report is to provide insights into the sales of summer items, and what to focus on to improve business performance.

The dataset used is a list of summer products and relevant information, such as price, color, units sold, rating, and merchant rating.

The custom variable "Revenue" was created by calculating **price * units_sold**, to be able to analyze the revenue brought in by the product. This information is used to find which products and merchants are the most profitable.

URGENCY BANNER

No urgency banner	
5M UNITS SOLD	8.48€ AVG PRICE
Urgency banner	
2M UNITS SOLD	8.40€ AVG PRICE

There is no significant difference between urgent and non-urgent products, since products with an urgency banner are on average **0.94% less expensive** than those without.

KEY INSIGHTS

High number of merchants, low number of items, potential for more revenue by increasing amount of higher-priced items?
